Introduction

I am a scientist with an interdisciplinary background on theoretical physics, electrical engineering, and computer science. During my undergraduate studies, I worked on numerical techniques for astroparticle physics problems. Then, I started working on AI applied to autonomous robots until I finished my M.Sc. diploma on the field, acquiring extensive experience on machine learning techniques and computer vision. Since then, during my Ph.D. in theoretical physics and in my postdoc positions, I acquired an extensive expertise on interacting quantum systems, integrable models, quantum field theories, mathematical physics, and complex systems in general. More recently, I was the Principal Investigator of the project CIQS funded by the Polonez Bis/MSCA grant, where I was responsible for the scientific research and development, teaching graduate students, and administrative tasks such as budget and personnel management. In addition, I have experience in the private sector, where I have worked as quantitative analyst, applying advanced mathematical techniques for data science and financial modelling techniques to investigate and tackle market and credit analysis.

Education

- **University of São Paulo** *2020*
  Ph.D. in Physics São Carlos, Brazil
  - Keywords: Bose gases, optical lattice, quantum phase transition, 1d interacting systems.
  - Thesis: A study on quantum gases: bosons in optical lattices and the one-dimensional interacting Bose gas. arXiv:2006.13100; teses.usp
- **University of São Paulo** *2015*
  M.Sc. in Electrical Engineering São Carlos, Brazil
  - Keywords: Autonomous robots, machine learning, computer vision.
  - Dissertation: Estimação de probabilidade de colisão com obstáculos móveis para navegação autônoma. teses.usp
- **University of São Paulo** *2012*
  B.Sc. in Physics São Carlos, Brazil

Experience

- **University of Salerno, Department of physics[]** *2024 – 2025*
  Researcher Salerno, Italy
  - DFT, ML for CFT models
- **Institute of Physics, Polish Academy of Sciences []** *2022 - 2024*
  Assistant Professor Warsaw, Poland
  - NCN Polonez Bis 1 Fellow
  - Principal Investigator of the project CIQS: Correlation aspects of Interacting Quantum Systems in reduced dimensionality
- **Faculty of Physics, University of Warsaw []** *2020 - 2022*
  Assistant Professor Warsaw, Poland
  - Postdoctoral researcher within the NCN Sonata project "Dynamic correlation functions of quantum integrable models: in and beyond the equilibrium" headed by Miłosz Panfil.
- **Institut de Physique de Nice, Universitè Côte D'Azur []** *2018 - 2019*
  Ph.D. Researcher Nice, France
  - Doctoral researcher under CAPES/COFECUB bilateral collaboration.
- **São Carlos Institute of Physics, University of São Paulo []** *2016 - 2020*
  Ph.D. Researcher São Carlos, Brazil
  - Doctoral researcher within project "Bose gases in optical lattices" headed by F.E.A. dos Santos.
- **Luz Financial Solutions []** *2015*
  Quantitative Analyst São Carlos, Brazil
  - Applied advanced mathematical techniques for data science and financial modeling techniques to investigate and tackle market and credit analysis.
- **São Carlos School of Engineering []** *2013-2015*
  M.Sc. Researcher São Carlos, Brazil
  - Master student within the project "Dynamic environments in autonomous robotics" headed by Valdir Grassi Jr.
- **Warthog Robotics []** *2012-2015*
  AI Developer São Carlos, Brazil
  - Developed machine learning algorithms for autonomous robotics.

Teaching

- **Quantum Field Theory** *2023-2024*
  Institute of Physics, Polish Academy of Sciences Warsaw, Poland
  ◦ Lecture notes
- **Statistical Physics** *2021-2022*
  Faculty of Physics, University of Warsaw Warsaw, Poland
- **Quantum Mechanics** *2021-2022*
  Faculty of Physics, University of Warsaw Warsaw, Poland
- **Computational Physics** *2017*
  São Carlos Institute of Physics, University of São Paylo São Carlos, Brazil
  ◦ Repository with projects and codes

Grants

- **CIQS: Correlation aspects of Interacting Quantum Systems in reduced dimensionality** *November 2022 - October 2024*
  Keywords: Quantum Field Theories, Integrable models, 1d interacting systems [GitHub]
  ◦ Project No. 2021/43/P/ST2/02904 co-funded by the National Science Centre and the European Union Framework Programme for Research and Innovation Horizon 2020 under the Marie Skłodowska-Curie grant agreement no. 945339.

Talks and Posters

- **Correlation aspects of interacting quantum systems in one dimension** *10-14 July 2023*
  International Conference on Statistical Physics - SIGMAPHI 2023, Chania, Greece
- **Correlation aspects of interacting quantum systems in reduced dimensionality** *December 2022*
  BEC seminar, CFT PAN, Warsaw, Poland
- **The relevant excitations for the one-body function in the Lieb-Liniger model** *20/02 - 04/03, 2022*
  São Paulo School of Advanced Science on Quantum Fluids and Applications, São Carlos, Brazil
- **Understanding the important excitations in the Lieb-Liniger model** *March 2022*
  Student workshop on integrability, 2022, Hannover, Germany
- **Correlation features of interacting bosons** *October 2021*
  Condensed matter physics seminar, FUW, Warsaw, Poland
- **A study on quantum gases: bosons in optical lattices and the interacting Bose gas** *December 2020*
  Condensed matter physics seminar, FUW, Warsaw, Poland
- **Bosons in optical lattices** *30/01 - 10/02, 2017*
  School on Interaction of Light with Cold Atoms, São Paulo, Brazil

SKILLS

- **Programming Languages:** Fortran, C, C++, Python, HTML, Julia, R
- **Systems and softwares:** Linux, LaTeX, Mathematica, MatLab, JupyterLab, ROS
- **Specialized Areas:** Quantitative analysis, Data Science, Machine Learning, Computer Vision, Financial Market
- **Research Skills:** Quantum Systems, Quantum Field Theory, AMO Physics, Integrability, AI, Autonomous Robots
- **Languages:** Portuguese (Native), English (Professional Proficiency), Spanish (Intermediate), Polish (Basic)
